

I am

The Bank

I'm trying to

Provide loans to
those customers
who come to us

But

prediction of credit
defaulters is one of the
difficult tasks for any
bank

Because

by forecasting the loan defaulters, the
banks definitely may reduce their loss by
reducing their non-profit assets, so that
recovery of approved loans can take
place without any loss and it can play as
the contributing parameter of the bank
statement.

Which makes me feel

not be able to service
the loan and also
reduce loan amount
